INDUSTRIA ALIMENTARE

1 HZASQ

Strong sequestrant action det.

A liquid detergent particularly indicated for CIP systems of dairy processing plants. It guarantees perfectly clean pasteurizers, milk tanks, transport tanks. This product thoroughly degreases the treated surfaces and its high sequestrant content significantly delays the formation of lime scale making unnecessary an acid wash.

Tank 10Kg 25Kg

2 HZALC

Alkaline descaler

A highly alkaline liquid detergent, chlorine free, suitable for the removal of organic residues in CIP systems. Its particularly suited for mechanical washing. It thoroughly degreases and dissolves organic residues typically found in food processing facilities (especially dairy products). It quickly and easily removes grease, proteins and fatty substances, with a low foaming profile. This product also contains sequestrant additives that make it effective in hard water and also prevents the formation of lime scale. It is suited for CIP systems, multi-purpose boilers, pipes for the transfer of liquids, tanks and silos for the storage of alimentary liquids, bottling plants.

Tank 25Kg

3 HZPDL

Acid descaling detergent

A specific product effective against milkstone in mechanical milking systems. This product is suited for periodic descaling of CIP circuits and tanks of milking plants. It is also indicated for bulk coolers. HZPDL must be used every 8-10 alkaline washes done with HZCLOR 3.

Tank 10Kg 25Kg

4 HZKIT

Concentrated acid descaler

A non-foaming detergent with nitric acid, specifically formulated for CIP systems for cleaning non-organic residues such as: lime scale, calcium phosphate scale, etc. HZKIT is specifically designed to clean equipment and utensils in the food and zootechnic industry. This product is also ideal for manual descaling of utensils and containers.

Tank 10Kg 25Kg

5 HZCLOR 3

Liquid sanitizing detergent

HZCLOR 3 is a non foaming chlorine disinfectant and detergent formulated for the cleaning and disinfection of equipment and utensils in the food sector. It instantly dissolves in water and, if diluted as indicated, does not damage the surfaces with which it comes into contact. The alkaline salts are capable of removing all organic residue. The strongly oxidizing active chlorine agent disinfects and leaves shiny surfaces. It can be used for both CIP systems and for manual cleaning of the equipment. The sequestrant additives contained in the product, improve the effectiveness of the detergent by stopping the salts responsible for water hardness from becoming indissoluble lime scale residue. It is suited for CIP systems, multi-purpose boilers, pipes for the transfer of liquids, tanks and silos for the storage of alimentary liquids, bottling plants

Tank 10Kg 25Kg

6 HZCLOR SAN

Alkaline detergent with chlorine

A caustic sanitizing detergent, formulated for the cleaning and sanitation of equipment and tools for food & beverage processing and zootechnic sector. Its chlorine content guarantees an elevated level of cleanliness and hygiene by eliminating any residual bacterial load on the equipment. This product also contains sequestrant additives that make it effective in hard water. HZCLOR SAN also works at low temperature (less than 30°C) and is compatible in the recommended dilution with all materials used in equipment and tools. It is suited for CIP systems, multi-purpose boilers, pipes for the transfer of liquids, tanks and silos for the storage of alimentary liquids, bottling plants.

Tank 10Kg 25Kg

7 HZVSH

Neutral degreasing detergent

A highly concentrated neutral detergent with a great foaming profile for daily foam cleaning of dairy processing systems and milking plants. It thoroughly cleans vertical and horizontal surfaces of tools and machinery.

Tank 10Kg 25Kg

8 HZDET

Quick action detergent

A low foaming water soluble liquid detergent, specifically designed to remove dirt from CIP systems and food processing equipment. Its particular formula doesn't contain any phosphates making it safe for the environment. It leaves clean and shiny surfaces.

Tank 10Kg 25Kg

9 HZANS

Strong sequestrant action det.

A low foaming alkaline detergent suited for manual cleaning and floor washing machines. This product is ideal to clean industrial surfaces, machineries, food processing steel tanks. This product easily removes every soil on all washable surfaces.

Tank 10Kg 25Kg

INDUSTRIA ALIMENTARE

16 HZDQA

Multipurpose sanitizing detergent

A sanitizing detergent, H.A.C.C.P. compliant, for all hard surfaces. Its formula contains specific surfactants for optimum detergency and quaternary ammonium salts which are effective against gram negative and gram positive bacteria, fungi and viruses. It is suited to clean hard surfaces like formica, stainless steel, aluminum, glass, plastic, leatherette, floors and lavatories.

Tank 10Kg 25Kg

11 HZCLOR FOAM

Foaming sanitizer active chlorine

A foaming detergent with active chlorine that thoroughly sanitizes and is H.A.C.C.P. compliant. It generates a compact stable foam that clings to vertical surfaces allowing the active substances to remove dirt and bacteria. This product leaves perfectly cleaned surfaces without any lime scale residue. This is a must have product for food processing facilities.

Tank 25Kg

12 HZBASIC FOAM

Foaming detergent

An alkaline detergent which generates a compact foam that clings to vertical surfaces allowing the active substances to remove dirt. This product leaves perfectly cleaned surfaces without any lime scale residue. This product is a must have in order to keep food processing equipment clean.

Tank 10Kg 25Kg

13 HZPDS

Acid descaling detergent

A dual action product which cleanses and descales, suitable for the cleaning and maintenance of dairy processing equipment (for instance milking equipment and bulk coolers). It generates a compact stable foam that clings to vertical surfaces allowing the active substances to thoroughly eliminate hard to remove calcareous deposits and grease.

Tank 10Kg 25Kg

14 HZPOL IB

Poly biguanide sanitizer

A sanitizer suitable for a complete sanitation of milking equipment, milk bulk coolers, meat processing, beverage industry, egg processing and food transport vehicles. This product both has high bacteriostatic and bactericide power against a large spectrum of micro organisms such as: gram+, gram-, fungi, yeasts and molds.

Tank 10Kg

15 HZSQA

Sanitizing germicide

An effective germicide against a large spectrum of micro organisms. This product is best suited for the sanitation of food processing equipment, pipes, milk storage tanks, farms, meat processing, beverage processing, chicken farms and egg processing facilities.

Tank 10Kg 25Kg

10 SANY FOAM

Sanitizing foam hand soap

Its innovative formula with gentle, mild surfactants and emollients substances, ensures perfect hand care and germicidal action. This product is ideal for staff members of hospitals, food processing facilities, zootechnic facilities, where a bacteria-free hand hygiene is requested. This product has a neutral pH for the skin, so it can be used for repeated hand washing.

Box 6x1Kg 12x500ml 3x4Kg

17 SANY PLUS

Sanitizing hand soap

Its innovative formula with gentle, mild surfactants and emollients substances, ensures perfect hand care and germicidal action. This product is ideal for staff members of hospitals, food processing facilities, zootechnic facilities, where a bacteria-free hand hygiene is requested. This product has a neutral pH for the skin, so it can be used for repeated hand washing.

Box 6x1Kg 3x4Kg

18 SERVICE

Dosing System

Heart offers a service of installation and maintenance of dosing systems for the automatic dilution of specific products for food processing facilities.
